

## Press Release

2014/08/25

New webinar on the topic of “Food Safe Packaging”

# Everything you need to know about Primary Aromatic Amines in Flexible Packaging

Food packaging safety is an issue to which Henkel – as the world’s largest adhesives manufacturer – is deeply committed. On its knowledge platform “Food Safe Packaging Portal”, Henkel presents a new webinar about “Everything you need to know about Primary Aromatic Amines (PAA) in Flexible Packaging” on September 12, at 10:00 AM (CEST). In her webinar, Henkel expert Helga Garmann will give in-depth information on many aspects of PAA in flexible packaging.

Primary aromatic amines are a topic of big concern. What is it, why do they need to be considered and what are the techniques to measure PPAs and their migrational behavior. In this live-seminar, Helga Garmann will also talk about risk minimizations and Henkel’s solutions for flexible packaging applications.

Participants will also be able to pose their questions live and online to the Henkel presenters while the webinars are still in progress. Those interested in participating can register at [www.henkel.com/foodsafety](http://www.henkel.com/foodsafety). Once they have registered, they will also gain access to the Premium Area, which offers further webinars, whitepapers, a comprehensive glossary, and videos covering a range of key issues.

Henkel operates worldwide with leading brands and technologies in three business areas: Laundry & Home Care, Beauty Care and Adhesive Technologies. Founded in 1876, Henkel holds globally leading market positions both in the consumer and industrial businesses with well-known brands such as Persil, Schwarzkopf and Loctite. Henkel employs about 47,000 people and reported sales of 16.4 billion euros and adjusted operating profit of 2.5 billion euros in fiscal 2013. Henkel’s preferred shares are listed in the German stock index DAX.
