New Webinar on the topic of “Food Packaging”

Basics in Migration – Adhesives in Food Packaging

Food packaging safety is an issue to which Henkel – as the world’s largest adhesives manufacturer – is deeply committed. On its knowledge platform “Food Safe Packaging Portal”, Henkel presents a new webinar about “Basics in Migration – Adhesives in Food Packaging”. In this interactive webinar, Dr. Matthias Frischmann will talk on June 5 from 4 PM (CEST) about the basics in migration and looks forward to answering corresponding questions.

Preventing migration is a key topic in food packaging, especially with regard to the use of adhesives. But what does migration actually mean, how does it occur and which factors are influencing migration? Participants will also be able to pose their questions live and online to the Henkel presenter while the webinar is still in progress. Those interested in participating can register at www.henkel.com/foodsafety. Once they have registered, they will also gain access to the Premium Area, which offers further webinars, white papers, a comprehensive glossary, and videos covering a range of key issues.

Henkel operates worldwide with leading brands and technologies in three business areas: Laundry & Home Care, Beauty Care and Adhesive Technologies. Founded in 1876, Henkel holds globally leading market positions both in the consumer and industrial businesses with well-known brands such as Persil, Schwarzkopf and Loctite. Henkel employs about 47,000 people and reported sales of 16.4 billion euros and adjusted operating profit of 2.5 billion euros in fiscal 2013. Henkel’s preferred shares are listed in the German stock index DAX.
